PROFESSIONAL SUMMARY

Full Stack Developer and UI/UX Designer with hands-on experience in React.js, Node.js, MongoDB, and Gemini AI. Computer Engineering student passionate about building accessible, AI-powered web applications with clean architecture and real-world impact.

EDUCATION

Swaminarayan University Kalol — Gandhinagar, Gujarat — 2022 – Present
BE Computer Engineering | Coursework: DSA, Web Technologies, DBMS, OOP

R.S.K. Public School *(CBSE)* | *Class XI–XII, Science & Mathematics* — Completed

GEMS English School *(ICSE)* | *Class X* — Completed

ACHIEVEMENTS & CERTIFICATIONS

Dev Heat Hackathon — Participant — fast-paced development hackathon — Feb 2026

Policy Hackathon — Participant — policy-driven problem solving — Feb 2026

Opencode '25 — Open Source Contributor — collaborative coding event — Feb 2026

Idea Submission & Evaluation Round — Shortlisted — idea selected out of competitive submissions — Mar 2026

PROJECTS

Drishti – AI Visual Assistant for the Visually Impaired | *React.js, Node.js, Python, YOLOv8, MiDaS, Gemini API* — GitHub

- Built a full-stack AI visual assistant with COCO-SSD object detection, face recognition, and voice feedback — offline-capable via service worker caching; Node.js backend with round-robin Gemini proxy (5 keys)
- Implemented a RAG voice-query feature ('tell me about PM Kisan') with a structured knowledge base, online/offline fallback, and speech queue to prevent audio conflicts

TruthStorm AI – Misinformation Investigation Platform | *React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Gemini API* — GitHub | Live

- Engineered a multimodal misinformation analysis platform using Gemini API to evaluate claims, captions, and images — generating credibility scores with explainable, signal-based reasoning (XAI)
- Built a JWT-authenticated REST API with MongoDB-backed investigation history, search, filtering, and pagination; React UI supports dark/light mode and a personal dashboard

Debate-AI – Real-time AI Debate Coach | *JavaScript, Gemini API* — GitHub | Live

- AI-powered debate tool with real-time opponent, live logical fallacy detection, and argument scoring (Logic, Persuasion, Evidence) with a persuasion analytics dashboard

Side Projects

Santa Cruz Bicycles Clone | *Responsive frontend clone with full navigation, smooth animations, and pixel-accurate UI* — Live

Yeti Cycles Clone | *Frontend clone with video background, animated product carousels, and multi-section layout* — Live

News Shorts | *JavaScript, Currents API — live news aggregator with categorised headlines and card-based UI* — Live

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript (ES6+)
Frontend: React.js, Tailwind CSS, HTML5, CSS3, Responsive Web Design
Backend & DB: Node.js, Express.js, MongoDB, RESTful APIs
AI & Tools: Gemini API, YOLOv8, MiDaS, COCO-SSD, Figma, Git, GitHub
Concepts: Data Structures & Algorithms, DBMS, OOP, System Design

CORE COMPETENCIES

Software Engineering: Full-stack development, component-based architecture, RESTful API design, clean code principles
Problem Solving: Analytical thinking, algorithmic reasoning, debugging, and optimizing data flow
Design Thinking: User-centered design, rapid prototyping, iterative UX improvement
Collaboration: Cross-functional communication, team development using Git workflows, documentation

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native) | **Interests:** Open-source contribution, scalable system design, HCI, emerging web technologies
Currently Pursuing: Advanced DSA and System Design for engineering roles at top-tier tech companies
